A fresh graduate from Universitas Gadjah Mada, majoring in Information Technology, with experience in internships and part-time work. Highly passionate about the Information Technology field, specifically programming, and constantly seeking opportunities to learn and grow. Currently skilled in web-based platform development and open to exploring other areas. Quick to adapt, work well in a team, and have good time management, ensuring optimal contribution to the team.

WORK EXPERIENCE

UX Engineer Internship

February 2024 - June 2024

PT. Global Data Niaga, Tbk. (Blibli.com)

- Contributed to the development of component libraries and design systems, enhancing UI elements and increased coverage in integration testing to ensure product quality and consistency, all within a collaborative and fast-paced environment.
- Provided alternative content management solutions using a Content Management System (CMS) approach which can shorten the update workflow to improve efficiency and boost productivity.

Back End Developer

January 2024 - February 2024

Teman Bisnis Digital

- Developed a worker scheduling management platform with key features: user registration, clock-in, clock-out, and shift management.
- Designed and optimized backend services to ensure efficient and reliable scheduling and registration processes.
- Collaborated on mobile development for user registration and scheduling features.

Full Stack Developer

October 2023 - January 2024

PT Tilikan Indonesia | Part Time

- Developed and maintained a survey application with a performance improvement of 93.33%.
- Developed a mapping dashboard application to visualize geospatial data within the area of Indonesia, enabling comprehensive analysis and insights for large-scale decision-making.

Full Stack Developer

February 2023 - December 2023

Pelaksana Pusat Kampus Merdeka (UGM) | Part Time

- Contributed as part of a dedicated team responsible for the development and maintenance of the Merdeka Belajar Kampus Merdeka programs: Praktisi Mengajar and Wirausaha Merdeka.
- Contributed to the initial development of the Praktisi Mengajar.
- Developed and maintained Wirausaha Merdeka, enhancing existing features and improving functionality.

Front End Developer

February 2022 - May 2022

PT Kedata Indonesia Digital | Part Time

- Developed a web-based platform for data processing applications.
- Implemented seamless integration with the backend systems to ensure optimal functionality and performance.

Information Communication Technology (ICT) Internship

June 2019 - May 2020

CV Karya Hidup Sentosa

- Focused on work as a Database Administrator, particularly with Oracle Database.
- Also assists in Android (Kotlin) and website (PHP) development.
